EDUCATION

Texas A&M University (Computer Science) — Class of 2030

Relevant Courses: CSCE 110 Programming I, CSCE 120 Design and Concepts, ENGR 102 Engineering Lab I

WORK EXPERIENCE

JPMorganChase — Software Engineering Intern *June 2026 – Present*

- 8-week internship. Building a Robo-Advisor application to help users decide what stocks to buy. Serving as Software Developer, Scrum Master, and Business Analyst. Designed the risk profiling questionnaire and scoring rubric used to classify users into risk tiers, and mapped each tier to a corresponding ETF portfolio (VTI, BND, QQQ, VXUS, VB, TIP) for diversified asset allocation. Contributed to backend development in Python, integrating the scoring logic with the recommendation engine & testing edge cases across risk tiers.

Civics Unplugged — Fellowship Admissions Associate *June 2026 – Present*

- Built and owned the end-to-end admissions process for the Civic Innovators Fellowship, including designing application questions, rubric, and selecting a new platform to manage 1,200+ applicants. Led and trained a team of 15 interns to read and score submissions, and produced final demographic reports to guide leadership decisions.

STREM HQ — Instructor *July 2026*

- 35 hours at a 1-week camp for 14 kids; taught Civil Architecture using Minecraft.

Sierra Digital Inc — Sustainability & Enterprise AI Internship *June – July 2025*

- 3-week internship. Built a Sustainability Compliance Chatbot using HTML & CSS to help businesses adopt eco-friendly practices and meet regulations. Suggestions drawn from a library of 50+ environmental regulations. Supported company research on SAP technologies.

AEOP GEMS — Near-Peer Mentor *May 2023 – May 2024*

- Taught regular camps/classes on Python and color/pedestrian detection via AutoAuto cars.

Girls Who Code / Code Ninjas — Summer Camp Instructor *July 2023*

- 50 hours at a 3-week camp for 60 girls; taught Scratch, MakeCode, Excel, binary, and pixel art to encourage women in CS.

Code Ninjas — Sensei (Instructor) *June 2023 – August 2024*

- Assisted kids with Scratch challenges and Code.org lessons, helping them debug code and understand programming concepts.

ACHIEVEMENTS

Leadership Positions

Dulles Girl Bytes (Girls CS Club) — Co-President (4 hr/wk, 36 wk/yr, 4 yrs)

August 2021 – May 2026

- Co-led biweekly meetings and coding workshops for **20+** members.
- Trained a team of **5** to teach Python, Java, and Scratch to **100+** elementary and middle school students across 3 local schools; volunteering sessions averaged 3.5 hours per week.
- Co-planned and ran the District's first Middle School Coding Contest ("VikeBytes") with **60** participants, in partnership with Dulles CS Club. Managed outreach to all 15 FBISD middle schools.

Dulles Technology Student Association — Co-President (2 hr/wk, 36 wk/yr, 3 yrs) *August 2021 – May 2026*

- Co-led a **30+** member chapter, hosting workshops to prepare members for state and national competitions.
- Geospatial Technology: Created a Houston hurricane impact map using Python, Git, GIS, and image processing. Analyzed 20+ official Hurricane Beryl impact reports to produce a 28-page analysis and synthesized summary map.
- Software Development: Led a team of 3 to develop a Streamlit app modeling fertilizer diffusion to mitigate eutrophication, using a random forest regression model and the Advection-Diffusion-Reaction equation to generate interactive soil management charts for farmers.

Dulles Spanish Honor Society — Co-President (2x) (7 hr/wk, 36 wk/yr, 4 yrs) *August 2021 – May 2026*

- Co-organized monthly service socials for a **90+** member chapter (e.g., Día de Los Muertos ofrendas, Guatemalan worry dolls for donation).
- Directed the Dulles Multicultural Show 2025: **170** performers, **800+** audience, raised **\$5,644** for member scholarships.
- Planned Fiestaval, a cultural fair featuring **10+** cultures and hands-on activities for **70+** attendees.
- Coordinated the annual Flashmob celebrating diversity with **80** participants across all 3 lunch periods.
- Managed an international pen pal program connecting **140** participants with a school in Spain.

Other Leadership Roles

- Dulles Science Olympiad — Vice President & Dulles Math and Science Academy — Events Coordinator

Summer Programs & Fellowships

UT Computer Science Summer Academy for Women (60 hr/wk, 1 wk/yr) — June 2025

- **1 of ~60** nationwide selected for this all-expenses-paid week-long experience. Coded a Tetris Light Show in C++ with my team; awarded "Most Algorithmically Challenging Program."

Civics Unplugged Academy at UCLA (98 hr/wk, 1 wk/yr) — July 2025

- **1 of 25** nationwide selected; week-long all-expenses-paid program focused on climate innovation post-LA Fires. Worked with political officials on final presentations; my group earned 3rd place for a presentation on Post-Disaster Housing Affordability.

Digital Civics Academy (20 hr/wk, 1 wk/yr) — July 2026

- **1 of 110+** youth leaders across 60+ cities to participate in a week-long immersive program focused on ethical technology leadership, digital advocacy, and storytelling. Will train in activism and policy techniques to drive change around digital wellbeing and AI.

Honors & Awards

- Girl Scouts Gold Award
- The Contribution Project \$400 Grant Awardee
- Girl Scouts \$1,000 Emerald Circle Scholarship Winner
- GSUSA Gold Award Scholarship of \$5,000 (One recipient per Council)
- Fort Bend **County Proclamation Award** from Regional Courthouse for ThisIsFine
- NCWIT Aspirations in Computing — Regional Affiliate Award
- 2nd Place — Science Olympiad Codebusters Regionals 2025
- 1st Place — Digital Video Production, Technology Student Association Regionals 2024

SKILLS

Programming Languages: Dart, Python, Java, Scratch, C++, HTML/CSS

Technologies & Tools: FlutterFlow, Firebase, Streamlit, Git, GIS, SAP, MakeCode, AI/ML, Chatbots

Languages: English (native), Spanish (proficient)

GIRL SCOUT GOLD AWARD

For my Girl Scout Gold Award, I built [ThisIsFine](https://thisisfineapp.my.canva.site/), a web-based disaster preparedness [game](#) developed in partnership with the Fort Bend County Office of Homeland Security & Emergency Management and featured on Fort Bend County's Official [Hurricane Resources Page](#)! (under "Test Your Knowledge") . Six gamified disaster scenarios walk players through real response steps, built with FlutterFlow, Dart, CSS, and Firebase. The game has reached **5,000+ youth** across **37+ Fort Bend ISD workshops**, with **91% of users showing measurable improvement** in preparedness. Awarded a **\$400 grant** from The Contribution Project, which funded **250 preparedness kits** distributed to kids at workshops. I tabled at Back-To-School Events alongside Fort Bend Emergency Management and was invited as an [alum speaker to Quail Valley Middle School](#) to encourage students on their Texas Performance Standards Project journey. I presented at the "2026 READY Fort Bend Expo" in May. I got a chance to share my story on a [Blog with the Contribution Project](#) and [Girl Scouts](#) as well! I come from an area hit repeatedly by disasters like Harvey, Beryl, and the Kerr County floods, so I built ThisIsFine to give young people a concrete way to engage with climate preparedness instead of fearing it.
